

# Advent 3B2 SGML XML Dongle V7.5.1 (today Arbortext 3B2 or Arbortext Advanced Print Publisher)

Advent 3B2 Dongle 5.5.5b, 6.03e, 7.00a, 7.5.1

Non-new

Advent 3B2 Dongle

released for versions 5.55b, 6.03e, 7.00a

1 Dongle with serial number: Max

CD-ROM without "3B2 version 7.00a for serial number XXXX with Licence Key + 3B2 text version 7.00a with serial # and license key"

CD-ROM without "version 3B2 and 3B2 6.03E smear Version 1.2 for serial number XXXX"

CD-ROM without "version 2.7 for 3B2 Webkartenmodul serial number XXXX"

CD-ROM without "version 5.55b ODBC 3B2, 3B2 smear"

Manuals of all versions of a laser printout.

The license has including possibly a new value of 11600 EUR VAT. had.

The existing version can be updated to be current. This must, however, contact the manufacturer until a daily basis.

The following text is from Wikipedia, the free encyclopedia, and information about the general history of this product:

Arbortext 3B2

From Wikipedia, the free Enzyklopädie

3B2 (originally Advent 3B2, 3B2 later Arbortext) is a computer program for the set range. Meanwhile, it has the name "Arbortext Advanced Print Publisher".

3B2 based on SGML from the start. This was very early 3B2 is able to process SGML / XML without conversion losses. The Unicode version was only added to the standard variant and enabled the internationalization of documents, including languages ??with non-Latin characters and writing directions. In addition, 3B2 feintypographische very detailed ways that enable a high quality work rate.

3B2 metric calculates internally in ten thousandths of a millimeter, and knows the differences of some 17 national units in the input. The software was developed by the W3C XSL 1.1 standard. 3B2 also supports open standards like HTML, CSS, XML, XSLT, XSL-FO, XPath, SGML (with its own built-in parser and a SaX), MathML, TeX, CALS, and the graphics format SVG.

3B2 are beginning to proprietary scripting languages ??like ShowString (rate control) and script programming (program control) is used. Perl was added later (with its own additional library). The regular expressions can be found everywhere. In Version 9.1 (Release 16 May 2007) is also Java access. Undisciplined programming can be rapidly fatal in 3B2, especially since there is no debugger (he should know all the languages!) As in conventional programming languages.

3B2 uses its own font next to the old format (FNT/Typ3) now also TrueType and OpenType fonts (based on TrueType and PostScript).

3B2 exists in the following versions:

- \* Standard 3B2
- \* Unicode 3B2
- \* 3B2 server

The strong programming, it is possible to realize a complete automation of layouts with different languages. The clear strengths of 3B2 are catalog production, technical documentation, legal works, and everything appears to be formalized.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
