- RIP: Delta Technology PDF with 2x Xeon Processors (HP Proliant Windows 2000 Server)

Herkules élite - Spitzenbelichter for all claims

Herkules élite covers with his advantageous maximum format of 558 x 762 mm the demands of medium format pressure machines as well as – by two pressure-compliant ausgeschossene films – also the big formats of most curves and role pressure machines.

ideally from. élite is interesting of the Herkules also for newspaper printer, because his format is mostly sufficient to expose two sides or a panoramic side.

As a plus offers of the Herkules élite Stanzmöglichkeiten in the long ones as well as on the short format side. Standard systems of pressure machines of Heidelberg and ONE Roland as well as for the American and English market can be as integrated as customised systems. With it becomes to the demands the printer after installation of her internal Stanzsysteme fully Calculation carried.

At an exposure speed of 43000 rotations / min. (716 scan lines / sec.) élite lies of the Herkules completely in front in the market. Compared with his predecessor Herkules Per the speed was increased on 25 percent. Only 53 seconds are necessary for four sides A 4 with a resolution of 1270 dpi.

Beside the standard resolutions in 1270, in 1693, in 2540 and 3387 dpi the high resolutions are available in 4064 and 5080 dpi. The 120th grid for especially demanding works is moveable with it. Besides, by the resolution-conformist advertisement dimensions of 7.5 µ m to 20 µ m the optimum size of the laser beam is put for every desired resolution step. By the duplication of the resolution in FastScan-or drum extent direction with delta Technology the number of the eligible resolution steps increases even on eleven.
