

# X-Rite Model 341 Densitometer

**BRAKENSIEK®**  
SYSTEMHAUS

## **X-Rite Model 341 Densitometer**

The 341 can be used to make dot area and density measurements quickly and easily. The density function is useful for evaluating and setting the exposure of any imagesetting system, positive or negative. Use it to verify the DMax of your films, ensuring light-blocking film properties when making proofs or printing plates.

The dot area function is useful for verifying screen tint values from contacted films, duplicate films, or originals. It can zero on the film base, and accurately measure from 0 to 100 percent. It is handy and easy to use in linearizing or calibrating the tone value of any imagesetter.

### Qualities

- \* Built-in luminous table
- \* Calibrateable internal source of light
- \* Sound value function checks the grid values of contact, Duplicate film and originals

### Technical data

- \* Measuring field size: 2 mm and 3 mm of screens normally (changeable)
- \* Measuring arm's length: 14 mm
- \* Measuring area: Density to 5.0; sound values: 0-100%
- \* Wiederholgenauigkeit: Density:  $\pm 0.01 D$
- \* Electricity supply: NiCad accumulators
