

Agfa Phoenix 2250

Agfa phoenix in 2250

Agfa phoenix Trommelbelichter

Non-new

The Agfa phoenix is an extremely professional Trommelbelichter for the demands of Akzidenzdruckereien and other professional users in pressure preliminary stage and pressure. The phoenix is entirely conceived as a Belichter for the application in printers companies and delivers films ready with pressure plate or printable polyester pressure plates.

The phoenix in 2250 corresponds with his exposure format of 570 x 736 mm to the standard format of most 4-sides curve pressure machines.

The phoenix in 2250 is suitable for the exposure of Setprint plus polyester pressure plates and film material. Hence, users can realise an easy Computer-to-Plate-Workflow. Thanks to the high exposure speed a complete sentence of printable Setprint pressure plates can be produced at less than five minutes. With the phoenix the punches and pliage of the Setprint pressure plates are cancelled, so that this Belichter is an ideal solution for 4-colour work with editions up to 15000 printings.

The phoenix Belichter can expose films with resolutions of 1200, in 1800, in 2400 and 3000 dpi with grid width up to 200 lpi.

The series 2 V2 Upgrade for the software is made.

Equipment of the complete arrangement according to the original calculation (see pictures):
