Linotype Circon

Not New

The Linocolor Circon within the range of the Desktop scanners sets new yardsticks in efficiency and quality. The hard- and software is produced to fulfill the highest requirements. The singular TripleLens system is used beside the extremely efficient color CCD line, consisting of 10.500 pixel elements. Three different resolution stages, optimized on the respective collecting main size, can be selected. In the SuperHighRes mode with the Circon by the optical dissolution of 2400 x 2400 dpi a quality is obtained, which does not need to shrink from the comparison with transparency. scanners. And the EverSharp function offers further security that each Scan succeeds, because it provides automatically for optimal depth sharpness with each specific collecting submittal. All of this makes the Circon the point scanner of its class.
