

Heidelberg Nexscan F4100 + NewColor

Heidelberg Nexscan F4100 + NewColor OSX

not-new

The Nexscan F4100 is a universal and fast CCD color flatbed scanner. It is operated via the software LinoColor Heidelberg or NewColor. The scanner is equipped with a CCD color line of 3 x 8,000 pixels. This is achieved with an optical resolution of 5,080 dpi.

It can scan originals up to a maximum size of 315 x 457 mm.

Including Heidelberg NewColor Version 2.5 for Apple Macintosh.

With this device you produce high end scans

The picture of your photos and pictures should be as high as possible. Only an outdated, perfectly-aligned high-end scanner with the new ICC profiles can afford it. When it comes to the image quality you should make no concessions and only invest in refurbished equipment. We are happy to advise you on which data format, which resolution or which color space for your product is best suited and which software and scanner solution is to create the easiest and cost Cheapest. We specialize in refurbished high-end scanner with spare parts supply service, training and installation in the world including optimal adjustment. In our warehouse in Dortmund, we have over 50 high end flatbed and drum scanners in stock. On request, the system is complete with a new computer, freshly serviced with new ICC profiles installed for inspection and review, a training course for negative scanning service contract done on your premises and subsequent maintenance contract. Brakensiek systems company is a specialist in this field since 1990 and is one of the pioneers of color management services. We have installations worldwide. We are the exclusive Distributor SilverFast Software for High End Scanners and set several years since the company LaserSoft Imaging AG, these devices Chromagraph S3300, S3400, Heidelberg Tango, Heidelberg Topaz available. If desired, you can also buy the scanner, was developed in which SilverFast for these devices.
