

Contex FSC 3050 Magnum Wide Format Scanner

Contex FSC 3050 Magnum Wide Format Scanner

Not-New

System: Scan to File

Inclusive PC System AMD Dual Athlon

The IDEAL/Contex FSC 3050 Magnum is fast, scanning an E-size (A0) color original at 1.3 IPS at 400 dpi turbo.

50" Wide Scanning

Front-loading Increasing Productivity

Handles Media up to 0.6" Thick

Supports ICC Standards

Supports 36-bit RGB color

Supports Feature Extracted Color

Supports Graytone and Black & White

Applications

The IDEAL/Contex FSC 3050 Magnum Color Scanner provides the best possible, 50" wide scan-to-print for color renderings, maps, and large color graphics where color fidelity is very important. The IDEAL/Contex FSC 3050 Magnum is used in the GIS, Reprographics, CAD, and Graphic Arts industries for color classification for vectorization, storage, retrieval, conversion to CAD, populating an online planroom, Scan-to-web, and Scan-to-Print. It can efficiently rasterize drawings up to 50" wide (E-Size) by any length on media up to 0.6" thick. The IDEAL/Contex FSC 3050 Magnum can be used stand-alone or as a component in a customized solution.

Color Accuracy

The IDEAL/Contex FSC 3050 Magnum conforms to the ICC standard. The IDEAL/Contex FSC 3050 Magnum is an accurate, two-dimensional sampling device; document motion in one axis and electronic scan of the Charge Couple Device (CCD) semiconductor cameras is the other device. It is front-loading, and scans with unparalleled accuracy, +/- 0.1% in both the X and Y axis to ensure the most accurate scan possible. The entry-level copier interface, JETimage LITE, performs image capture, color mapping, and transfer directly to a standard inkjet plotter. The copier interface supports closed loop color calibration. The IDEAL/Contex FSC 3050 Magnum supports Area Diffusion Logic (ADL) which allows documents containing mixed photographic and line-art (including text) areas to be captured with greater detail.

High Performance Scanning

The IDEAL/Contex FSC 3050 Magnum has variable resolution settings from 50 to 600 dpi selectable in one dpi increments to match user requirements. This scanner can scan a typical E-Size color original at 1.3" per second at 400 dpi turbo. The IDEAL/Contex FSC 3050 Magnum requires WIDEimage, the operating software for color scanning. The IDEAL/Contex FSC 3050 Magnum can extract color and patterns of color into separate layers which can then be converted to DXF and DGN vector files with WiseImage.

Scan, Index, and Edit

The IDEAL/Contex FSC 3050 Magnum supports color scanning applications. RasterID, intelligent title block contents recognition software with built-in, breakthrough OCR technology, automatically extracts title block information from scanned drawings to an archive database. RasterID, an optional software package from IDEAL, provides a solution to the bottleneck problem of indexing hundreds and thousands of drawings during and after the scanning process. Edit drawings in raster with the same ease as editing a CAD file using WiseImage, an optional intelligent raster editing software package from IDEAL. WiseImage is a powerful drawing editor that performs raster to vector conversion and OCR.

Scan, Share, and Print

Provide instant network access of scanned drawings with IDEAL's IntraSCAN. Archive large format drawings on a company intranet or a secure, password protected internet with IDEAL's PlanRoom. Search, retrieve, view, and print large format drawings using only a standard web browser.

Looking to turn your inkjet into a digital copier? Scan large format color originals with heavy detail and print them out to any inkjet plotter without losing any details. The IDEAL/Contex FSC 3050 Magnum Color Scanner is the perfect front-end to any Windows-based inkjet plotter.
