Agfa Apogee Taipan verse. 3.01

With the Agfa-Apogee you dispose of a modular workflow management system on PDF base.

The complete Prepress production runs off controlled and automated – from the input, curve assembly up to the issue. The data flow is clear and influenceable any time.

The data of the single jobs become after the processing on the Apogee-Taipan-RIP, in the pilot have filed and in the PrintDrive issue manager of the Apogee system and are given there before the exposure on record or film first with a digital colour colour proof printer.
