Ein einzigartiges Merkmal echter digitaler Drucksysteme ist die Fähigkeit, variable Daten zu verarbeiten. In einem zunehmend digitalen Kommunikationsumfeld liegt im Druck variabler Daten ein großes Potential für höhere Kundenantwortraten und größere Loyalität. Da jeder Druckauftrag während des Druckens geändert werden kann, können Sie und Ihre Kunden über allgemeine Druckerzeugnisse hinausgehen und problemlos personalisierten Druck mit Mehrwert erstellen. Da sich z.B. das optionale Splash G720 RIP leicht in die Datentechnologie von Drittanbietern integrieren lässt, z.B. matchflow GmbH & Co. KG, können Seiten aus verschiedenen Text und Grafikfeldern zusammengesetzt werden, wobei der Inhalt dieser Felder je nach Empfänger und von Seite zu Seite variieren kann.
