

# TIFF/ITflow

TIFF/ITflow - the only completely automated solution on the market for converting Heidelberg's Delta List jobs to P-1 compliant TIFF/IT files with 100% integrity of the original data.

TIFF/ITflow provides:

- Full Delta RIP integration
- Automatic TIFF/IT generation
- DDAP TIFF/IT P-1 compliant
- Compatibility with all TIFF/IT workflows
- Compatible with Approval and PolaProof
- Productivity and film-saving imposition functions

TIFF/ITflow has been specifically designed to enhance the productivity of Heidelberg's Delta RIP technology. Fully compatible, it runs on the same platform as the Delta RIP and automatically generates pixel for pixel copy of ripped Delta List files.

Providing the ability to send TIFF/IT files electronically for publication, TIFF/ITflow has set the standard for automation and compatibility with the DDAP TIFF/IT P-1 format.

With its compatibility, high-quality proofing systems, and ability to send digital files TIFF/ITflow is the only product to achieve the maximum workflow productivity from the Delta RIP.

TIFF/ITflow enables users to proof full resolution, trapped Delta List files to the Kodak Approval or the Polaroid PolaProof, and archive jobs in a standard open format.

TIFF/ITflow can also be used in any workflow with Harlequin RIPs, providing automated printing of TIFF/IT files from TIFF/ITflow or other TIFF/IT sources to Harlequin ScriptWorks.
