Filemaker Pro 5-7 WIBU-Key Dongle copy protection

Dongle Plug in 1.1 for Filemaker 5-7 and Windows

Licence Developer

With HC-Key Plugin you are able, data from one
To select WIBU-Key Dongle of system WIBU and
thereby to protect your valuable solutions.

WIBU-Key Dongle select:
USB or with parallel Dongle
from a client computer or within a network

Version
1.1

System standards
WIN 98, WIN ME, WIN 2000, WIN XP and WIN 2003
The application of the in each case topical service of stack is recommended.

FileMaker compatibility
FileMaker Per (version: 5, 6 and 7)
FileMaker per Unlimited (version: 5 and 6)
FileMaker per Developer (version: 5, 6 and 7)
FileMaker per run time (version: 5, 6 and 7)
The application of the Updaters newest in each case is recommended.

Hardware compatibility
You find information about WIBU-Key Dongle under:
www.wibu.de

Scope of supply
3 x Filemaker example files
1 x Plugin
1 x documentation into German
1 x Registriercode

Developer licence list price ** 449.00 EUR

Information about the WIBU-Key:
WIBU-KEY — the memory giant
WIBU-KEY there is as a standard design with 10 proficient codes / to user's code entries and as a Lite version with
a proficient code / user's code entry. The versions for USB, PCMCIA and LPT have 16 kByte memories.

Every user's code exists of 24 bits, i.e. you can encode a total of 240 different modules or products in a WIBU box
with 10 entries. Then, besides, the user's code is evaluated bit-wise as a master code.

An entry can be simply converted in an Unit counter or an expiry date. Then i.e. you have, e.g., 5 entries with 5
independent Unit counters. With an Unit counter you can realise a Pay-Per-Use-Version. Then thus your software
could be begun, for example, 20 spots. Then the customer buys other unities of utilisation with you. You can
subtract the really spent time in unities defined by you (minutes) with the Unit counter.

With the expiry date you can steer, how long your software runs. Then you can extend your customers the licence

either, completely constantly freischalten or even extinguish.

Every WIBU box with the plus orders more than 16 kByte additional memories. Besides, the memory is divided in twice 8 kByte. The first 8 kByte are coupled to the first entry in the WIBU box, are encoded, can be programmed only with your FSB and be selected only with a signature (as with a password). You can deposit this signature of course in your software. You can read the second 8 kByte by means of the WIBU-KEY-API without restrictions and write.

WIBU-KEY for every platform

WIBU-KEY is available for Windows, Mac OS and Linux. In addition, we offer you a driver in the source code for the integration of WIBU-KEY in other also self-developed operating systems.

The WIBU-KEY API is uniform for all platforms, i.e. you must carry out the integration only once and not for every platform apart.

They would leave the choice to your customers whether does he use your software on the Macintosh calculator or the Windows PC? However, besides, he should be able to use only one version? Then you simply use for the Mac Os version and the Windows version the same proficient code / user's code. Now the customer can work only on the calculators in whom the accordingly programmed WIBU box is. And he can change arbitrarily from Macintosh calculator after Windows PC (of course also on a Linux PC, if you support this).

If you do not want to allow the changes between two different platforms or only against surcharge to your customers, then simply use two different user's codes. Already you can determine whether the customer may use both versions, or which version he.

WIBU-KEY can be also pursued on the network. This goes on heterogeneous networks. The server WIBU-KEY can be, e.g., a Linux PC by which licences are booked up for Windows PCs and Macintosh calculators.

The right WIBU box for every use

The hardware - the WIBU box - is available in different construction forms. And the best, besides: They can exchange these construction forms any time. Besides, our driver takes over the whole work automatically in the background for you.

This offers you not only high flexibility (you can move any time your customers of USB on PCMCIA without having to carry out a change in your software), but also a security for new interfaces. The WIBU KEY customer whose old DOS software runs even today under Windows XP these can also pursue with a WIBU-BOX/U (USB VARIATION) without carrying out even one change in her software. And, besides, there was at the time of the production of the protected software still no USB interface.

The following WIBU boxes are available:

WIBU-BOX/AND +
for the USB connection
10 entries
16 kByte memories (8 kByte protected, 8 kByte freely accessibly)

WIBU-BOX/RU +
for the USB connection
1 entry
16 kByte memories (8 kByte protected, 8 kByte freely accessibly)

WIBU-BOX/P +
for parallel connection (LPT)
10 entries

16 kByte memories (8 kByte protected, 8 kByte freely accessibly)

WIBU-BOX/RP +

for parallel connection (LPT)

1 entry

16 kByte memories (8 kByte protected, 8 kByte freely accessibly)

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
