System requirements

20" Cinema and 23" Cinema HD displays

- Power Mac G4 or G5 with graphics map NVIDIA or ATI Radeon in 7500 graphics map (or better) and Mac OS X 10.2.8 (or more anew)
- PowerBook G4 with DVI connection and Mac OS X 10.2.8 (or more anew)
- Windows PC with the graphics card which supports DVI connections with full-digital single link range and the standard VESA DDC for Plug&Play configuration

Fascination wide picture

The product row of the Apple Cinema displays with wide picture format provides for the arrangement of documents a suitable format which does justice to the way of thinking of your brain. They fancy several documents side by side from the left to the right and can see them now also thus on the screen. Thus palettes, timelines, additional windows and a lot can be indicated easily more. This is not to you yet enough? Thanks to the especially narrow frame you can use several screens side by side for an almost seamless representation.

Tone in tone

With the design of the Apple Cinema of display it was paid attention to the fact that all models are tuned perfectly to the elegant aluminium case of power Mac G5 and PowerBook to systems. The designers of Apple have chosen carefully this colour design, so that the indicated colours can be effective always well and have a look at you your works in a neutral frame. Suitably to this clear and plain design there are in the back of the Apple Cinema displays only one single cable which transfers the graphics signals which electricity supply guarantees and provides connection connections.

Effortless adaptation.

Thanks to the smooth hinge you can bring your Apple to display already with a light touch in the desired position. The consideration corner is regulated thus in an area between -5 ° and +25 ° to do justice to the different demands of the users.

VESA correspondent assembly

They can put up your Apple display quite adaptably everywhere and easily adapt. With the optional VESA fixture any VESA correspondent assembly solutions are possible: in a kiosk system, on a wall, swivelling with the help of a swivel arm and many more.

Periphery binding made easy

Their Apple display orders more than two FireWire 400 connections as well as an USB 2.0 heave with own electricity supply and two connections. They can connect easily a printer, scanner, camcorder, iPod or another periphery device without booking for it the connections of the computer. Another advantage: If you attach a Kensington theft protection to the suitable connection in the back of the Apple displays, is also provided for the security.

Dual-Link-DVI

With a resolution of 2560 x 1600 pixels 30 needs" Apple Cinema HD display Dual-Link-DVI-Konnektivität. Now

the dual link support is integrated serially in all 15" and 17" PowerBook G4 to models and is provided by all configurations of the power Mac G5 product row. The advanced, optional NVIDIA Quadro FX 4500 graphics map for the power Mac G5 offers as a solution for an announcement surface which meets all the wishes: two 30" Apple Cinema HD displays which offer more than 8 million pixels.
