Introduction The X-Rite® ToolCrib application provides several tools which help users interact with and evaluate several X-Rite instruments. This application's primary intent is for troubleshooting a misbehaving instrument, not for large-scale data retrieval.

#### Features:

- \* Serves for the import of data in Windows or Mac programme.
  - \* Simulates the keyboard input at release of a measurement in the device.
  - \* Lists all measuring values which are available on the interface (dependent on device).
  - \* The worth separators and block separators can be selected.
  - \* Macros which simplify the work routine can be deposited.
- ToolCrib can be opened only if all the other programmes are closed which access to the interface where the measuring instrument is connected.
