X-RiteColor® master

Software for colour formulation and quality assurance

The programme X-Rite Color master offers you in the version 7.0 direct access to colour controlling data in production locations worldwide. The new version encloses an enlarged achievement spectrum with new tolerance and analysis functions. Available for QA master and Formulation master uses for your specific business demands. Especially on your branch fitted - paintings, plastics, pressure, packaging, sprayings, printing inks and textiles.

Measurement, analysis, control and communication of your colour data

With the help of the X-RiteColor master software you can communicate your colour data about one single polished and software nevertheless friendly to operator. With X-RiteColor master you can accelerate production processes, administer colour data about several locations away and achieve considerable high-class improvements, while you shorten the clock pulse which increase efficiency of the colour data communication, colour rubbish avoid, provide different recipes per colour and faster attain the control of your colours. They can count on the fact that innovations of X-Rite on the topical state of the technology are and we do justice to the demands of our customers by regular software updates.

New functions in version 7.0

QA

Graphic job function

With this enlarged function you can provide measuring points optically on a bitmap, so that data can be analysed without difficulties and be compared. In addition, the import of a standard is possible for bitmaps for specific uses.

Hunter Toleranzen

Now tolerance after Hunter Lab and DE is available as a standard function.

Customised standard tolerance

Save time, while you put standard tolerance for the specific needs of every customer.

Colour stability check

An easy allocation of controlled standards as a test possibility for the device achievement.

Conformist tolerance

With the new function for conformist tolerance users can provide her own passport / Fail-Toleranzen. This conformist tolerance is defined over the function for user-defined formulae.

Master curves

This rationalised process saves time and money. Now with ColorMaster you can fix a collection master curve for your suppliers and customers.

Limited in time standard use

If the passing definition of the active test allows as a standard for analysis purposes.

Enlarged function "to memories under"

The new function "to memories under" allows the easy copying of customers, including standard. Customer data can be reproduced so fast and easily.

The formulation

Viscosity

If it enables to users of ColorMaster to describe the solvent need (per colouring) and to use this information, around a certain viscosity to rezeptieren.

Colouring fire-fighting reports

If a colouring is extinguished, a report is provided which indicates the affected standards which must become anew rezeptiert.

Case and deck strength correction

Now during the correction the user also has the option to the case and deck strength correction.

Store after weight portion

Now ColorMaster 7.0 also offers the possibility of the loading correction after weight portion. Now in addition to the loading correction after volume portion users with ColorMaster can correct the loading also after the weight portion.

Rezeptierung of firm elements

With the new function users can force an allocation and use firm additional elements for colorings during the Rezeptierung.

Software for the quality assurance - for perfect colour results

The X-RiteColor master programme for the quality assurance gives you the control of the colour directly in the production - namely accurately, efficiently, simply and innovatively.

QA master is available in three implementation for the most different uses and demands. Treatment of standard tolerance, extinguishing of tests after data sign and time sign, adding and removing sign. The automatic archiving stores all previous data and allows the announcement of the entire test course by the renewed call of standards. The strength adaptation and thick adaptation allows with comparison with the Stärkeoder density standard the announcement of colour differences in the "being" state or in the "Wenn" state.

Metallix-QA

Metallix-QA contain the whole functional spectrum of QA master I and II as well as the possibility to access with the X-Rite to Mehrwinkel devices from different colour information corners colours, to analyse them and to provide reports.

QA master II

With QAMaster II measure, analyse and control your colour data with the whole functional extent of QAMaster I and many additional enlargements. Conformist Excel reports, plots with in colour coding, surface cover and contrast degree calculation, projects and user-determinable views are only some of the functions which optimise your processes and provide for savings of time.

QA master I

Our base software package for the quality assurance provides for quick and efficient colour control. Count to the advantages of QA: Calculation of the colour difference, passport / Fail, adjusting of tolerance warning steps, treatment of standard tolerance, extinguishing of tests after data sign and time sign, adding and removing sign as well as data announcements on a click.

With Rezeptiersoftware you get your colours certainly in the clutch

The Rezeptiersoftware X-RiteColor master offers you Farbrezeptierungs and quality assurance functions in a complete package. The programme available in three implementation allows the Rezeptierung of opaque colours, glazes and saves time and resources by the combination of rest or base colorings with shelf supplies.

Formulation master III

Formulation III contain the full functional extent of all steps of Formulation master and QA master. In addition, Formulation III graphics job functions, set possibilities for conformist tolerance, an easy production and change of calibration sentences, colouring calibration and ColorDesigner offers emulation mode. This is our leading software package for the most demanding Rezeptierungsanforderungen.

Formulation master II

Formulation II offers the whole functional extent of QA master II and Formulation master. To the other advantages count surface cover/Kontrastgradberechnung, sign announcement with coloured coding, projects, production of alternative standards, announcement options as well as colouring fire-fighting reports and viscosity.

Formulation master I

X-RiteColor master Formulation I offers highly efficient quality assurance and Rezeptierung. In addition to the functional extent of QA master I the base package for the Rezeptierung offers you the setting of standard tolerance after customer, Restfarbenrezeptierung, Rezeptierung in queues, strength adaptation or thick adaptation, case and deck strength correction, store after 0/0-weights, use of firm elements with the Rezeptierung and film weight test mark.

Server-based software solutions

Decide on the X-RiteColor master software to extend your topical colour controlling data system and to optimise. We offer global solutions and support for your manufacturing and quality assurance standards.

X-RiteColor master web edition

Web edition is the first Rezeptierungs and quality assurance programme on browser base. Conceived for the application in server-based calculator surroundings in which several users can access at the same time from different international locations at the same time colour data.

Advantages

X-RiteColor master web edition offers a row of advantages for big enterprises with a central IT department, under it:

An easy administration

The use is installed once on the data bank server. Administration, management and Support for the use occur from one single central location.

Less demand of the PCs

The right "work" occurs on the server, therefore, no big software package on the PC of the user must run.

Worldwide access

Users from all over the world can combine about a user name and a code-word, Internet connection and a Windows-based PC with the central server.

Controlled and standardised data

With all colour standards of the enterprise on a central data bank server all users can see the same data in every location and use.

Speed

Because the software on a dedicated server runs, receive as a rule a quicker achievement than with a use which is loaded on the hard disk.

Economic efficiency

For enterprise with many users the web lowers edition the whole operating expenses for the software.

Zwei Versionen

X-RiteColor master web edition requires Windows® 2000 server and Microsoft Terminal of service. The use is available in two versions:

Metallix-QA

For the customers who need comprehensive quality assurance functions for her expiries, however, no recipe function.

Formulation master III

For the customers who need all quality assurance functions beside all formulation functions of ours Formulation-master III platforms.

Device compatibility

X-RiteColor master is completely compatible with the efficient 0 °/45 °-, Kugelgeometrieund to Mehrwinkel devices as well as with the devices without contact of X-Rite. These products offer you complete solutions to the control of the colour quality with quick and exact measurements and a thought-out, in narrow cooperation with customers developed user interface.

Server-software standards

- Windows 2000 server with terminal of service
- Windows 2000 server client Access licences (CALs) and terminal server client Access-licences (TSCALs) like for every client of Microsoft necessarily
- High-speed connection with the Internet
- Webhosting possibility

Client standards

- Windows 98 SE, in 2000 professional, professional XP
- Adobe ® Acrobat ® reader ®
- Microsoft Internet Explorer 6.0 or higher
- Serial port (or USB) for device communication
- Connection with the server (Internet or Intranet)
- Firewall must open terminal service port in 3389

Server-hardware standards

- Server standards depend on the number of the necessary places. You receive further information from your ITAbteilung or your X Rite representative.

Moreover, available:

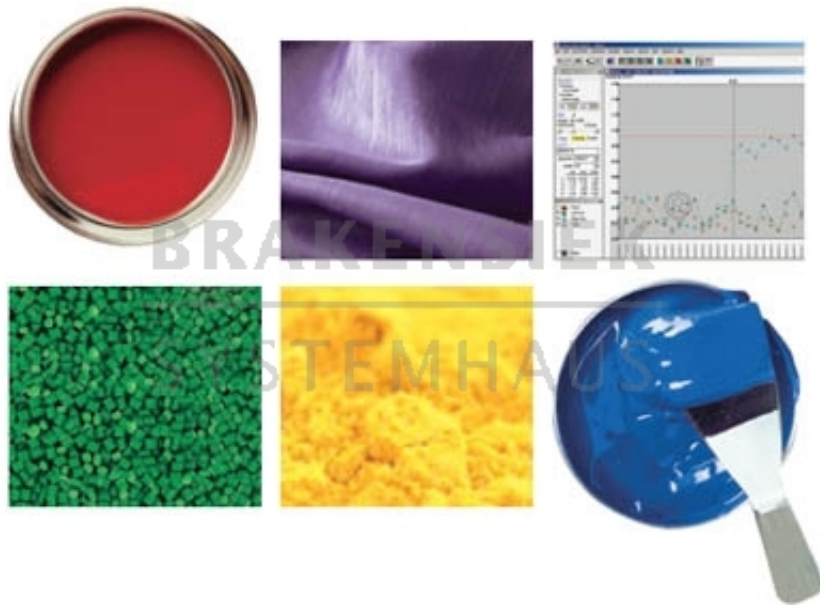

Standalone application

If allows the installation of single or multiple uses on Standalone-Workstations.

LAN

The X-RiteColor master software is able of network and allows the access of several users to a common data bank on a local network (LAN).
