Canon EOS-1Ds Mark II

EOS-1Ds Mark II is a digital reflecting reflex camera which is convincing by high-quality admission quality with extremely exact detailed reproduction. Their many-sided functions and the resistant case in proven EOS-1 quality also do justice to the high demands of demanding users.

Features

Canon full format CMOS sensor with approx. 16.7 Megapixeln
Up to 4 pictures per second in full resolution
Buffer for up to 32 JPEG admissions in succession
Digitally photo professional
DIGIC II processor
Flash control E-TTL II
ISO 100-1.600; extendable
Spritzwassergeschütztes magnesium case
Memory map slots with double memory possibility
LCD screen with 230,000 pixels

Resolution is only the beginning.

Mega achievement by mega pixel

Of 36 x 24 mm of full format CMOS sensor EOS-1Ds Mark II generates with approx. 16.7 Megapixeln files which can be converted to just 50 mb of uncompressed TIFF quality at 24-bit colour. Over the integrated deep passport filter colour defects and Moiré effects are reduced; moreover, a switching circuit is implemented in the chip to the suppression of the picture rushing. The ISO delicacy of from 100 to 1,600 (standards) can be reduced to 50, or extended on 3,200.

Excellent signal processing

Responsibly for the excellent signal processing DIGIC II, Canons is a highly competitive processor of the second generation. The clenched performance of the new CMOS sensor, the DIGIC II and a big buffer system allows quick picture sequences with up to 4 B/s and a buffer for up to 32 JPEG admissions in succession.

Resistantly

EOS-1Ds Mark II is operational by the stable spritzwassergeschützte magnesium case also under adverse conditions; the high-capacity fastener for up to 200,000 releases is also constructed really solidly. With admissions under critical conditions you simply play it safe and choose the Back-up mode: to the memory of the pictures on the CF as well as memory map SF.

Spotless achievement

Reliable achievement and professional image quality offers EOS-1Ds Mark II not only on the light bright day: equipped with Canons of distance-coupled flash control E-TTL II this camera also makes excellent pictures with difficult lighting conditions. Especially with bright or reflective motives or with objects not located in the picture middle E-TTL II is convincing by correct exposure and an optimised control.

Creative influencing control

Of 2.0 inches of LCD screen is ideal with approx. 230,000 pixels to check picture sharpness and picture composition afterwards; with the help of the 10fach-zoom details check up themselves increase and easily. Other advantages: concurrent admissions in RAW and JPEG and the choice between two colour rooms (sRGB and Adobe RGB). The white comparison can be corrected for blue / ambergris and Magenta / green in each case in steps by -9 to +9. White comparison-Bracketing is possible from -3 to +3 in whole steps.

Varied connection possibilities

The new software Digitally photo professional allows a quick processing of RAW files free of loss for still better

control possibilities. FireWire (IEEE1394), USB (for the photo post print) and a videoexit provide for comprehensive connection possibilities. In addition, EOS-1Ds Mark II with all Canon to EF objectives and EX-Speedlites is compatible.
