The high final model CHAMELEON Tx 36 can generate pictures in brilliant, photo-realistic colours. The scanner reads in the colour data with 42 bits and passes on of it the best 24 bits and the calculator. In connection with 36 "large format plotter you have the perfect digital photocopier in the hand. Thanks to the high precision with the capture of colours and details you can scale your creations without high-class loss on full poster size. High-quality, colour-conformist fluorescent lamps guarantee the highest colour exactness.

Colour precision

The Contex-colour scanners can be calibrated by the user on colour issue after international standards (NTSC, sRGB colour rooms). The Precision Color unique for large format scanner system allows to you any time to calibrate the plotter and to provide thus for stable and predictable colour issue.

Automatic scanner servicing

The CHAMELEON Tx was so constructed that you can count on the fact that he optimally works, while you completely concentrate upon your work. The 3C built-in in the scanner Auto-Maintenance selfservicing system provides for the fact which the cameras are aimed always optimally, are adjusted and calibrated. If the scanner has become once eingestellt, he carries out a number of operations automatically and takes from you thus the tiresome routine work which are necessary by other scanners. With the patented Contex technology white point and black point as well as the Stitching of the cameras are supervised constantly and corrects during your scanner operates.

Scan at the touch of a button

The operating surface of the scanner contains programmable action keys for starting often required functions directly in the scanner. Each of these keys begins a Scan and opens the picture in a suitable use in the suitable format. The scanner has keys for scanning, copying and for the dispatch by e-mail of the loaded original.

Advanced power management

The internal temperature of the device is to be achieved while scanning of extreme importance around qualitatively high-quality results. The Advanced power management system brings the scanner fast on his optimum operating temperature and supervises them then in view of the slightest rushing CCD. Moreover, the system allows to you to begin automatically the scanner, so that he expects you in the morning already warmgefahren.
