

# Contex Software

**BRAKENSIEK®**  
SYSTEMHAUS  
**Software**

A dedicated toolset to optimize CAD files for 3D printers.

## **Context software**

The Context software are highly competitive tools with you CAD files scale, colour, label and for the optimum expression for Context to 3D-printers can prepare. The pressure software works together with a huge number of file formats, including full colour files.

### Key features:

- Import VRML – incl. import of textures; also for Farbscans, G sharp data, FEA data and coloured Assemblies
- Export PLY – permits the file export for advanced data treatment
- 3D preview of the construction space – improved the visualisation of the component production
- Labelling function – allows to the user to provide parts with date, check number, graphics or text
- Volume bodily function - generates volume models from G sharp data in the VRML format
- Import of several models – permits interlacing and simultaneous printing out of several parts
- Functions for the Panen, scaling and tricks of models
- Pressure time preview – maximises the efficiency of the printer
