Universal travel zoom AF28-300mm FA / 3,5-6,3 Tu XR LD Aspherical [IF] MACRO

This objective is the successor of the legendary XR 28-300mm which has proved itself as a universal travel zoom for all opportunities. As a Tu objective it was adapted especially to the technical demands of digital reflecting reflex cameras, however, can be used still also for analogous cameras.

It delivers sharp, varied and excellent pictures, with ultracompact construction method and extremely low weight. By the gigantic focal length area (in digital cameras it delivers an angle of vision which corresponds to a focal length area from approx. 45-480mm) the objective can be used universally and, hence, takes pleasure as a standard zoom in particular on travelling of big popularity.

The scattered light problem increasingly appearing with digital cameras was strongly minimised by his special reimbursement. On this occasion, become several extremely thin Metallhydrid layers on the glass lenses aufgedampft. This decreases the scattered light portion in actual manner. From it there result excellent and varied admissions. You find a Beispiel-Chart for downloading with a comparison to the predecessor's model here.

Besides, glass XR, asphärische lenses and LD elements provide for an optimum reduction of the image defects. The close set border lies with 49 cm about the whole focal length area. With that 300mm-setting you achieve a maximum image scale from 1:2,9!

Data

Article number A061

Groups - elements 13-15

Angle of vision 75 - 8

Construction method rotary zoom

Number of screen lamellae 9

The smallest screen 22

the shortest set distance [m] 0.49

Max Abbildungsmaassstab 1:2,9

Filter size [mm] 62

Weight [g] 420

The biggest diameter x construction length [mm] 73 x 83.7

Luminosity 3,5-6,3

Focal length [mm] 28 - 300

Solar screen
