

# PDF LifeSaver

Because where Belichter-RIPs or PDF converter ordinarily produce cryptic PostScript error messages with which one is demanded too much as a normal-mortal user hopelessly, PDF LifeSaver helps you to limit fast possible (n) mistake cause (n) to be able to eliminate this. PDF LifeSaver is an enlargement to Adobe Acrobat Distiller which provides for the fact that faulty PostScript or EP's code is visualised up to the faulty object as a PDF and if possibly the mistake is also localised immediately on the side.

**How does PDF LifeSaver function?**

After correct installation and activation of PDF LifeSaver in Acrobat Distiller (Mac/Win versions 4, 5, 6 and 7 are supported) appearing PostScript mistakes are intercepted about that and the following aid is offered:

The PDF file becomes up to the side, in that of the mistakes appears as generated (Distiller without PDF LifeSaver as well as most other rep simply break off at this point without generating an issue file).

On the faulty side the mistake is localised with the help of a note slip of paper in arrow form. With multilateral PDF documents a note slip of paper on the first PDF page points out to the fact that it concerns an incomplete PDF file which was generated by PDF LifeSaver. Inadvertent processing of incomplete data prevents this.

On the faulty side another note slip of paper is to be found which contain an exact, German-speaking mistake description which makes easier again the mistake search and a containment fehlerursache substantially.
