DCSMerger

DCSMerger is the missing link for using pre-separated data within a composite workflow e.g. within a PDF workflow or for using your latest in-RIP separation features of your RIP. It's new technology allows the merging of DCS files (images or CopyDot files saved as Photoshop compatible DCS format) without losing spot colors or converting into CMYK, as it would happen, when merging them with Adobe Photoshop or other tools. The result is a highres composite EPS file, which can be placed in applications like QuarkXPress, Adobe InDesign or others. You can print these files as highres composite including all spot color information to either a composite proofer, to Acrobat Distiller or to your PostScript 3 RIP, using in-RIP separation technology. Or you can print separations directly from your layout application to your older RIPs and get the correct output.

DCSMerger removes all limitations of DCS-images for use in a composite workflow. It correctly merges DCS-files including all spot colors or Duplex, Triplex... images. No more 72dpi screen resolution on Composite Proofers or in a PDF-file.

Have a look at the demoversion and find out, what DCSMerger can do for you. It works either manually, as a drag&drop application or in automatic batch mode, where it scans for images in specified watched folders. DCSMerger supports Photoshop compatible DCS 1.0 and DCS 2.0 images including single and multiple file formats. Version 1.5 supports also the DCS images from Adobe Photoshop CS and CS2.

Select your product:

DCSMerger 1.5 English Mac Full

DCSMerger 1.5 English Windows Full

DCSMerger 1.5 English Mac Upgrade (for versions before 1.4)

DCSMerger 1.5 English Windows Upgrade (for versions before 1.4)

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
