

KERIO MailServer

KERIO - Kerio MailServer

The mail server from Kerio for Mac OS X, Windows, Red Hat and SUSE Linux offers the following features:

- * Encrypted connections - for safe receiving / sending emails
- * Virus scanning - scans each email for viruses and worms
- * Spam protection - against overflowing mailboxes
- * WebMail - Comfortable from access to mail, contacts, etc. on the move
- * Mail backup and archiving - access to every email, every time
- * Groupware with Outlook - Shared access to calendars, address books, etc.
- * Mailing Lists - easy creation of distribution lists
- * Conversion tool for Microsoft Exchange

Product

- * Encrypted connections

Kerio MailServer supports SSL encrypted IMAP, POP3, SMTP and HTTP. Access to emails via email client, web browser or via WAP for mobile users possible.

- * Virus scanning

An incoming and outgoing emails are checked for pests and possibly included unauthorized mail attachments such as critical . Exe,. Or bac. Vbs will be automatically removed. Kerio MailServer is available in 2 Varrianten:

o Kerio Mail Server Base Edition

here is the scanning of emails by an "external" anti-virus engine (not included), which is integrated into the mail server. Currently supports the anti-virus software from Alwil, Eset, CA Computer Associates, Grisoft, Sophos and Symantec.

o Kerio MailServer with McAfee Anti-Virus

The full integration of McAfee anti-virus software facilitates the administration of the mail server, because the virus signatures are automatically updated and therefore the most current protection available.

- * Spam Protection

Kerio MailServer uses the spam filter of SpamEliminator. The spam filter detects incoming but also outgoing spam. Thus, users are protected on the one hand prior to receiving unsolicited e-mails, on the other hand, allows users to send spam mails. Kerio Mail Server detects and protects against directory attacks and spam messages classified by means of public blacklists and verification of sender addresses.

- * WebMail

For business or other mobile users have a sophisticated webmail interface. Users can send and receive email, look up at a different address book, can view calendars and other information automatically about upcoming events. An automatic synchronization with Outlook and Entourage is of course possible.

- * Mail Backup and Archiving

Kerio MailServer provides the ability to perform scheduled backups of the server. There is the possibility of backup incremental, differential or full backup. The archive feature of Kerio MailServer allows the archiving of all incoming and outgoing email traffic.

- * Groupware with Outlook

To facilitate small group collaboration, Kerio MailServer provides access to shared calendars, folders, tasks and contacts. The access can be made by or WebMail directly through Outlook with the Outlook Connector. For Mac users to integrate Entourage, iCal calendars and Address Book seamlessly into Kerio MailServer.

* Mailing lists

Mailing lists and discussion forums can be easily created, it is possible policies regarding subscriptions and messages to forgive.

* High Scalability

Due to the extraordinary scalability of 6.1 KerioMailServer both networks with 20 users are supported with thousands of users and corporate networks. Integration with directory services like Microsoft Active Directory, Apple Open Directory or any other OpenLDAP service offers administrators a comfortable managing a large number of users.
