

# SilverFast Nexscan Ai IT8 +HDR Studio für Heidelb. Nexscan 4200

SilverFast Ai STUDIO IT8 Heidelberg Nexscan F4100 + SilverFast HDR STUDIO

SilverFast Ai IT8 Studio Heidelberg Nexscan Nexscan + HDR Studio

For Mac OS X or Windows

The Nexscan software package includes an Ai Studio with IT8 calibration, an HDR Studio version, a, a 4x5 "transmitted light and a 5x7" Aufsichtkalibrationsvorlage the book "SilverFast ®: The Official Guide" and SilverFast manual.

The award-winning scanning software SilverFast from LaserSoft Imaging, Kiel, is now available for Heidelberg scanners Nexscan & Mac OS X Tiger.

SilverFast Ai STUDIO for Nexscan scanner allows the full dynamic range of its hardware into TIFF-data write. Thus, the negative reduction to 24 bit RGB obsolete. The ability to store the raw data and weiterzuverarbeiten by SilverFast HDR STUDIO opens up a whole new workflow ...

Press Comment

"... What makes SilverFast Ai better than the average bear for scanning tasks, Particularly for print and e-media production, is the truly well thought-out interface and the wealth of production-oriented features." "All in all, this (SilverFast) is a superior scanning environment with production-oriented options ... and professional results for both new comers and scan pros I highly recommend it"

With SilverFast Ai Studio for Heidelberg scanners Nexscan the full dynamic range can be written by the hardware into TIFF-data. Thus, the negative reduction to 24 bit RGB is unnecessary. The store opened with 48-bit data depth, maximum quality and productivity in the workflow. The originals can be scanned once with maximum dynamic range and a "digital original" stored or archived, etc. JPEG2000 with lossless compression.

SilverFast HDR STUDIO reads those raw HDR-like original documents on the scanner "offline" without loss of quality and processes them further. It is also possible to further process productivity while scanning at another job already scanned images in batch mode. It all SilverFast tools are available for image optimization, eg Negafix; Optimized negative scans to create more than 120 Fim-profiles and the possibility of your own. Even with a lossless compression in JPEG 2000 format, SilverFast able data is up to 7 times faster processing than any other image processing program. In combination with SilverFast's HiRePP function even 3GB files compressed lossless and can be opened quickly. Thanks SilverFast for the Heidelberg Nexscan scanner can now work with the latest Apple Macintosh G5 hardware, using standard adapters even via Firewire, fast and stable on Mac OSX including Tiger can be controlled. Other features include built-in IT8 calibration, advanced color correction (up to 12 colors), Plug & Play CMYK output on the monitor, the quick and easy batch processing via Job Manager, and the professional multiple densitometer.

Zusätzlich cost option: A soft proof is made possible by PhotoProof as add-on and printing with layout through the PrinTao. It follows from the combination of SilverFast Ai STUDIO and SilverFast HDR STUDIO becomes your dedicated workflow.

Please specify when ordering whether Mac or PC version is desired.
