

SWS MetaDimension Workstation

SWS MetaDimension Workstation

Non-new

Windows 2000 Server

2 Intel Xeon 2.66 GHz processors

2 GB of RAM

DVD ROM

Floppy disk drive

1 Fujitsu 73GB SCSI U320 HDD

1 Fujitsu 36.7 GB SCSI U320 HDD

1 Fujitsu 36.7 GB SCSI U320 HDD

Maximum of up to 5 hard disks can be installed

2 redundant power supplies

2 Gigabit Ethernet copper on Board

Prinect MetaDimension 5.0 + Enfocus Software

Prinect Metadimension option Colorproof Pro 4up

Heidelberg MetaDimension

Professional RIP and workflow software from Heidelberg.

Heidelberg RIP and workflow software MetaDimension

Heidelberg's new RIP and workflow software MetaDimension opened an entrance into the PDF-based workflow.

With the new PDF workflow module facilitates MetaDimension Heidelberg printers, trade shops and service bureaus with low-cost entry into the PDF-based workflow. At the same time provide open interfaces to integrate into existing workflow systems. MetaDimension also wants smaller printing companies and agencies offer an inexpensive alternative to the Adobe Portable Document Format (PDF)-based workflow to enter.

MetaDimension combines an open systems architecture and modular design. This means the software can be in an existing workflow environment integrating from other suppliers. MetaDimension based on the Adobe PostScript 3 printing and imaging technology, a PDF renderer. It thus offers a variety of prepress and workflow functionality within the Adobe printing platform. For example, after color management, proofing, trapping, page positioning, CIP 4 and OPI (Open Prepress Interface) support. Users also have a variety Acrobat plug-ins and applications available to a productive PDF workflow. Modular flexibility is the philosophy behind MetaDimension, because the use of Adobe Acrobat technology enables a wide range of other options and plug-ins from Heidelberg and other manufacturers.

MetaDimension has been on the new industry standard JDF (Job Definition Format). In addition, through import and export screened TIFF files can also control third party can be controlled.

MetaDimension in detail: the portal for easy access to PDF

MetaDimension works based on PDF and uses Adobe Portable Job Ticket Format (PJTF). As standard input formats PostScript (Level 1, Level 2 and 3) and PDF are accepted. InRip functions such as trapping, page positioning, color management and make a compact, automated workflow. In combination with other Heidelberg products Supertrap, an Acrobat plug-in, or the imposition software Signastation can build a more open, modular process. Signastation not only allows the imposition of complex jobs with both PDF and job tickets based on PostScript, but due to the use of CIP 4 PPF (Print Production Format), the disclosure of all job data to downstream stages of production.

MetaDimension can customize the user's needs and to expand even further. Integration with existing Delta Technology or Prinergy workflow are possible. This is achieved through the options DeltaFlow to acquire Delta lists MetaDimension and Auto Flow for automated acquisition of job ticketing and PDF files from Prinergy. MetaDimension can be operated from any Mac or PC on the network.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
