A Complete Reporting Solution Address all steps in the reporting process with one tool: data access, report design, management and delivery, and report integration with portals and applications. zoom in

Crystal Reports Server XI provides:

- Web report delivery and management (Flash)

Find out how you can manage and deliver reports to users inside and outside your organization.

- All the key features in other editions

Includes: data access; formatting and design; report viewing and interaction; application integration; security and support.

- One report designer

- Five* concurrent access licenses (CAL) for end users to view reports over the Web

- One year of maintenance and telephone technical support

Key Features:**Report Publishing Wizard**

Easily publish multiple Crystal reports to the Web. The report publishing wizard provides a step-by-step guide to configuring and uploading Crystal reports to the Web.

Zero-Client User Interface

Give end-users instant, secure access to corporate reports over the Web with a single URL. Deploy the out-of-the-box portal or customize it using a portal integration kit.

Report Scheduler

Set up reports to run at specific times or based on specific events. Plus, schedule reports to generate in specific formats such as Excel, PDF, and RTF.

HTML Preview

The iterative report design/view process is streamlined, with a new HTML preview that allows report authors to see how reports will look when published to the Web.

Report Object Repository

Manage report related formulas, SQL commands, text objects and images in the object-oriented repository.

Security Options

Make sure the right people have access to the right information at the right time. Crystal Reports Server includes robust security options for user, group, object and folder levels.

Interactive Report Viewers

Print, export, and drill down on charts and other report objects, and conduct conditional searches within reports over the Web. ActiveX, DHTML, and Java viewers are included.
