

AppleCare Protection Plan TechTool Deluxe CD

TechTool Deluxe AppleCare Protection Plan CD

Non-new

Without Protection Plan

TechTool Deluxe CD without Protection Plan Protection Plan as a replacement for lost or damaged media.

TechTool Deluxe-the AppleCare diagnostic and repair utility created by Micromat for Apple.

TechTool Deluxe is part of the AppleCare Protection Plan for Macintosh computers. It is based on Micromat's powerful TechTool Pro diagnostic and repair utility. TechTool Deluxe checks the major computer components covered under the AppleCare Protection Plan. It is available only by purchasing AppleCare Protection Plan for a Macintosh.

ImageTechTool Deluxe offers these features:

- * Repairs Directories by Rebuilding
- * Volume Repair Preview Report
- * Bad Block Detection on Drives
- * Checks the Drive Mechanism
- * Checks USB Functionality
- * Checks memory
- * Checks Video RAM
- * Checks CPU

Even more important than being Merely a diagnostic program that tells you what is wrong with your Macintosh, TechTool Deluxe can also repair many of the problems it finds.

What are the differences between TechTool Deluxe and TechTool Pro?

TechTool Pro is a full-featured computer diagnostic and repair utility that checks almost every single aspect of your computer. In addition to testing the components of the motherboard, TechTool Pro 4 can check items like network connections, FireWire and USB hard drives, and monitor the SMART status of drives. It also includes features to maximize your computer's performance, recover data from damaged drives, etc. TechTool Pro 4 includes all of the features of TechTool Deluxe, plus these additional features as well:

- * Volume / File Recovery
- * Backup volume Directories
- * Rebuilds Directory Structures
- * Secure File Deletion
- * Image File Integrity Checks
- * Checks FireWire and USB drives
- * File / Disk Optimization
- * Checks SMART Diagnostics
- * Checks Firewire Functionality
- * Geometry Video Screens
- * Checks Networks
- * Checks cache
- * Checks clock
- * Checks FPU (Mathematics)
- * Automatic Background Testing
- * Audio Tool
- * Testing Suites

- * Printed Manual
- * E-mail alerts of Problems
- * EDrive

One of the most innovative features of TechTool Pro 4 is the eDrive. An eDrive is an invisible emergency volume on one of your harddrives. This new partition is created WITHOUT the need to reformat your current drive. It contains a minimal copy of your system, a copy of TechTool Pro 4, and even includes room for other utilities. If you ever have trouble with your main drive, simply restart your computer from your eDrive. This gives you immediate access to the utilities you need to work on your main drive. With eDrive, there's no need to locate a bootable CD for system drive repair or maintenance. You can even update the eDrive as program updates are released, so you will always be using the latest version of the program.
