

Apple Power Mac G4 - PPC G4 867 MHz Dual

Apple Power Mac G4 - PPC G4 867 MHz dual

Non-new

Product description from manufacturer

Hold on tight - the Power Mac G4 is here! It features the revolutionary PowerPC G4 with Velocity Engine, which processes multimedia data with stunning speed. The Velocity Engine uses the independent vector processing - a technology originally developed for scientific supercomputers. This provides you with a power potential available with which you can even create and edit complex graphics files. Finally, people in creative occupations - which includes art and science - to work with unprecedented productivity. Apple designed the Power Mac G4 for people who work in creative occupations, and attach the computer as a tool of great importance, because it claims the pace of work, determines their productivity and may even be essential for success. The enormous speed of the Pentium processor provides all the ease in the shade, and his ground-breaking design of the Power Mac G4 is so powerful that its speed as measured in gigaflops of supercomputers or billions of floating point operations per second. Virtually no other desktop computer provides this service, especially when it comes to using programs like Adobe Photoshop is to use the professionals from the creative industry preferred. Just connect a DV camcorder and install Final Cut Pro from Apple - and you have a professional desktop movie studio.
