Markzware MarkzTools 7.x Mac int

Non-new

Supported languages??: English, German, French

MarkzTools is in part a tool for document security for Quark Xpress. It converts newer versions to older versions, rescues corrupted files, secures QuarkXPress content and ensure document integrity.

MarkzTools is an XTension that helps corrupted QuarkXPress documents to be avoided. The user can check the saved Quark document in order to obtain information on the integrity of the file and whether it is suspect. The current QuarkXPress error codes that inform the user about corrupted documents are [70], [39] and [108]. MarkzTools makes QuarkXPress backwards compatible, and allows its users to open Quark documents more recent versions. This XTension stores, converting a Quark Xpress V 6.5 project directly into a QuarkXPress 4.11 document. Other features of MarkzTools allow users to store a temporary copy of the document before the original document is stored. This function helps to avoid potential problems during the "storage" and the temporary file can be used to restore the document.

FEATURES

- Prevent corrupted QuarkXPress documents
- Retrieve text from corrupted documents
- Save your Quark files to lower version
- Allow view images in GRAY PREVIEWS to reduce file size
- Save files down to Quark 1.4

SYSTEM REQUIREMENTS

- Macintosh OS X.4 or higher
- Power Macintosh G4 or higher
- QuarkXPress version 7.x
- 128 MB of RAM
- 250 MB of free hard disk space

This is currently NOT Universal Binary XTension. If you are running QuarkXPress 7 on any Intel Mac, you will need to run under Rosetta quark mode.
