

Enfocus PitStop Professional 7.5

PitStop Professional 7.5

Non-new

PitStop is a plug-in for Adobe Acrobat combines, which PDF preflight, PDF editing and automatic correction of PDF files into one package. In this environment, PitStop has emerged as the standard product, which is to review and editing of PDF documents now used worldwide. Through various partnerships with manufacturers of PDF workflow systems (Agfa Global Graphics, Fuji, Heidelberg, Kodak, Screen, Xerox, EFI, ...) is PitStop today the most widely used (and used in practice!) Acrobat plug-in in the prepress .

PitStop is completely integrated into the surface of Acrobat, so that additional functions can use Acrobat as standard options. PitStop extends the basic capabilities of Acrobat to very powerful options:

Preflight - Review of PDF documents

PitStop offers very extensive preflight options in the review of PDF documents. You can generate so-called PDF Profiles that check PDF files on certain uses and list out all the problem areas in a report. A link takes you straight to the relevant problem areas in the scanned PDF document and displays all occurrences of the problem areas found to also visually identical. Most of the problems found can be corrected in the same optional step (if this is useful and desirable).

For the validation of PDF documents with regard to certain standards or uses PitStop offers already in the standard delivery profiles for PDF/X-1a, PDF/X-3, Ghent PDF Workgroup Profiles as well as for certain printing processes or applications, which of course also nor can adjust individually.

Edit PDF files

The extensive interactive editing capabilities of PitStop allow the selective editing and changing all the PDF objects, such as graphics, drawing paths, borders, line weights, text or images. You can create new objects using standard drawing tools, or insert via copy-and-paste from other pages or PDF files. PitStop is also suitable for small text corrections (eg spelling mistakes) and even allows the creation of new lines of text or paragraphs. Since version 7, it is also possible to convert lines of text into character paths.

Colors can be between different color spaces (Gray, RGB, CMYK or spot color) convert.

PitStop Professional is also able to image files in the new resolution to be calculated retrospectively (downsampling) or the compression type change. This can be for single, multiple or all images be selected in the document. It is also possible to image data to be converted into another color space. The most common application is certainly the conversion from RGB to CMYK. The conversion can be done in accordance with unallocated ICC profile. Existing ICC profiles can also be removed or re-assigned.

If your PDF document page size wrong or gates? With the adjustment for trim, bleed, art and media box, all relevant information to create new or edit.

Global correction options and action lists

PitStop Professional offers the respective interactive editing tools and options for automatic correction of problem-like objects. Take advantage of change to the global change options (colors, side frame change, hairlines eliminate (to a exposable value set), or define your actions, a kind of macro function (similar to Action Lists in Photoshop) for repetitive tasks that are executed automatically on mouse click.

About actions, certain processes save time and at any time for other pages or PDF documents and apply call. The features available on the action lists available, can be selected from a list and concatenated in any order. Via logical links can be created even longer and more complex macros. Once created, campaigns can be run from the server-based PitStop Server in batch mode for multiple PDF files. PitStop is shipped with a range of actions that you can use as they are, but which can also customize your needs.

Certified PDF is integrated

In PitStop (and PitStop Server, Instant PDF and PitStop Automate) is a technology called "Certified PDF" is integrated. This can be thought of as a "digital docket" that all changes to a PDF (automatically) are logged and you gives information about who, when, what changed about the items. Each time you save a PDF file, according

to an assigned profile automatically generates a PDF report that the corrections were made immediately recorded and integrated into the PDF file. Caused by the corrections to the deviations in the PDF Profile options, Certified PDF has the user visually and in the error log indicates. About Certified PDF can also be returned at any time earlier "versions" of the PDF file or version levels can be compared. Certified PDF is therefore suitable for a more secure transfer of PDF documents in a PDF workflow between multiple partners.

Certified PDF is already recommended in different countries of standardization institutes and associations from prepress and press for secure data exchange. Find out more about Certified PDFs Certified PDF

Supported operating systems and versions of Acrobat

PitStop 7.5 works with Adobe ® Acrobat ® 7.8 and 9 (Standard or Professional version) on MacOSX and Windows Mac OS ® X 10.3 or 10.4

Microsoft ® Windows ® 2000 with Service Pack 4

Microsoft ® Windows ® XP Professional or Home Edition

Adobe PDF 1.6 Support
