

HP Designjet 5000 42"

HP Designjet 5000

Upgradable with Level 3 RIP at extra cost

Upgradable with UV kit at extra cost

We bought following inks They are 100%

-light cyan(c4934a)

-yellow(c4933a)

-light magenta(c4935a)

-cyan(c4931a)

-black(4930a)

One cartridge costs 136.85EUR

Nicht-Neu, used

The HP DesignJet 5000 printers deliver a combination of production speed and ultimate photo quality unmatched by any other printer in their class.¹ Up to five times faster than the HP DesignJet CP Series printers!

Unprecedented speed with ultimate photo quality

- With a production speed of 52.86 m²/hr ², the printers are up to five times faster than the HP DesignJet CP Series printers!
- High printing speeds are the result of HP's JetExpress technology with a revolutionary 25 mm wide printhead.
- Ultimate photo quality with continuous tones, smooth transitions and a wide colour gamut is achieved using HP colour layering technology, six ink colours (CMYKcm) and 1200 dpi resolution.

Increased productivity

- Remote control via HP DesignJet WebAccess through your internet browser: job previewing, queue management, display of ink and media consumption levels, and accounting information.
- Very fast data transmission using a powerful HP JetDirect 610N 10/100Base-TX print server.

Low cost of operation

- Incredibly low cost of supplies
- High unattendedness with 680 cc ink cartridges, printheads that last for two to three cartridges, media rolls of up to 91.4 m in length, and a take-up reel (optional on the 107 cm models).
- New media saving features: length tracking plus downloadable profiles from HP's web site to ensure best results when using new media.

Consistent and accurate colours

- Consistent colours are produced from one print to the next and from one printer to another using automatic closed-loop-colour calibration.
- The HP DesignJet 5000 accurately reproduces both CMYK-defined and RGB-defined colours. Advanced features can be added via an external RIP.

Great ink and media flexibility

- Modular ink system with a choice of two ink sets: dye-based, and pigment-based UV inks.
- A wide choice of HP media types is available, including three new types: HP Photo Imaging Gloss, HP Photo Imaging Satin and HP Satin Poster Paper.

Great RIP support

- The printers can also be driven by the most common external RIPs on the market.
- Embedded HP-GL/2 processor with drivers for AutoCAD® and Windows.
