Norman Security2Go!

New edition of On-Demand Scanner on USB stick / antivirus plus antispyware / expert tool for the desk-top quick test.

Norman Data Defense Systems, a specialist in anti-virus, antispyware, and antispam solutions, brings with Norman Security 2 Go is the new edition of this successful product NVC to Go! based on the Norman Security 7 technology on the market. The on-demand scanner to check PC's USB flash drive, disk drives and folders on Microsoft operating systems for viruses and spyware. The solution works exclusively from the stick, no data installed on the computer and behaves invisible to existing security solutions. The mobile scanner is therefore suitable in particular for IT administrators, system building technicians and help desk personnel who investigate computer frequently with clients and colleagues for malware. The product can now be purchased through the Norman-partner.

For the safety check, the user selects the PC to test drive, folder, subfolder, or file with a single mouse button. The brace of anti-virus software and spyware protection that detects and removes viruses, worms, Trojan horses, spyware and other types of damaging code.

Reliable protection against unknown viruses

Like all anti-virus solutions from Norman Norman Security 2 Go works with the proactive SandBox technology. During the scan all suspicious programs are transferred to the SandBox. This simulates a whole computer or a network, letting the unknown file execute their routines. Then they shall assess and classify the program as either a trustworthy or dangerous. Norman thus provides an additional level of security beyond the traditional signature-based virus scanning.

Pricing and Availability

The on-demand scanner to a USB flash drive is now available for all partners Norman and costs 79 € including VAT. The price includes a twelve-month license for the current updates for virus signatures, or to download updated versions of the protection solutions over the Internet.
