Advanced tools for database developers

FileMaker Pro 10 Advanced FileMaker Pro 10 supplemented with tools for database developers. Develop and use it to create powerful and customized database solutions.

If you want to develop databases for yourself or your work group, and add the new features of FileMaker Pro 10, FileMaker Pro 10 Advanced is the right product for you.

The key features of FileMaker Pro 10 Advanced

- Custom Menus - Customize menus by script on models, or by renaming some menu items, add or delete, or replace the entire menu.
- Import of tables - create and update databases faster by importing multiple tables at once.
- Script Debugger - Check your script step by step to inform you in detail about script calls and follow the script finishes.
- Data Display - Check the calculation formulas without database changes. The data display shows field values, variables and expressions.
- Runtime Maker - Create standalone runtime applications that are executable without FileMaker Pro.
- Kiosk Maker - Create a database application, the user interface menus to hide. This is particularly useful if users are to carry out mailing lists and event registrations themselves.
- User-defined functions - Use custom functions in your database as often. If you update functions, the changes are automatically global.
- External plug-in API programming - Expand with more reliable methods of calculating the potential of data usage.
- Database Design Report - Create comprehensive reports containing information on all elements of your database schema -. Including boxes, tables and custom menus.
- PHP Site Assistant to call - the PHP Site Assistant in FileMaker Server to start directly with a command in the menu "Tools".

System Requirements

Operating system

- Mac OS X 10.5 PowerPC G4 (867MHz +), Power PC G5, Intel-based Mac, 512MB RAM
- Mac OS X 10.4.11 PowerPC G4, G5 or Intel-based Mac, 256MB RAM
- Windows Vista Ultimate, Business, Home (Service Pack 1) * 800 MHz or faster, 512 MB RAM, SVGA graphics card and monitor with a resolution of 1024 x 768 pixels
- Windows XP Professional, Home Edition (Service Pack 3) Pentium III 700MHz or faster, 256MB RAM, SVGA graphics card and monitor with a resolution of 1024 x 768 pixels

Compatibility

FileMaker Pro 10 and FileMaker Pro 10 Advanced use the same database format (. Fp7) as FileMaker Pro 9 and FileMaker Pro 9 Advanced and FileMaker Pro 8.x / FileMaker Pro 8 Advanced. Therefore, they can easily share databases between these applications. FileMaker Pro 7 and FileMaker Developer 7 are no longer supported - even if use of these two products the same FileMaker database format. The reason is that both FileMaker Pro 7 and have achieved FileMaker Developer 7, the end of their service life.

Features of the newer versions of FileMaker are supported only by them; for example, script triggers and the e-mail sending function via SMTP features of FileMaker Pro 10 and FileMaker Pro 10 Advanced and are only supported by them.

Additional requirements (all platforms)

Network protocol: TCP / IP: limited to nine simultaneous FileMaker client connections, each user must have a properly licensed copy of software available, allows more simultaneous connections FileMaker Server 10 FileMaker Pro 10 supports Internet Protocol version 6 (IPv6) addresses and IPv4 addresses.

Computer accessing FileMaker Pro files require a properly licensed and installed FileMaker Pro or FileMaker Pro Advanced 8.x, 9 or 10 FileMaker Pro 7 and FileMaker Developer 7 use the same file format as though FileMaker Pro 10 and FileMaker Pro 10 Advanced, are not supported, because they have reached their product life cycle.

Instant Web Publishing: A host computer with continuous Internet or intranet access with TCP / IP. (FileMaker Pro 10 and FileMaker Pro 10 Advanced manage up to five simultaneous Instant Web Publishing sessions, more concurrent connections enables FileMaker Server 10

Web browser: a database shared with Instant Web Publishing users use a common browser such as Microsoft Internet Explorer version 7.0 or Firefox 3.0. Mac users need Safari 3.1.2 or Firefox 3.0. On both platforms, earlier versions of Internet Explorer and Safari are blocked. Other Mozilla family browsers are not blocked but not supported by FileMaker. Users of these browsers are encouraged to upgrade to the latest browser version. JavaScript must be enabled in your web browser.
