6-7 min at full load run time

Product Description

APC Smart-UPS protects your data by supplying reliable, network-grade. The devices are available in either traditional Tower or Rack-although the available space is a problem. Award winning APC Smart-UPS is the perfect UPS for protecting business critical file servers (Intel or UNIX based), minicomputers, network switches and hubs, Point of Sale, Back Office hardware in the retail and banking and ATMs. Rack Mount versions are the particular rack optimized servers, server appliances, blade servers, other blade devices and rack-mounted network switches and hubs.

With the included PowerChute management software for servers and workstations can be an orderly system shutdown and advanced UPS management features are implemented (for all major operating systems). It is connected via the serial port or a USB port (USB not standard on all models). Available through the SmartSlot, an internal accessory slot that allows you to connect optional accessories to enhance the performance of the UPS. There are options for network connectivity with Web browser management and / or environmental monitoring, serial port expansion, and out-of-band management options are available. With pure sine-wave output ensuring compatibility with all connected devices. Intelligent Battery Management ensures high availability of the UPS, and the 16-segment bar graph display ensuring information and management. The Smart-UPS is a UPS that you can rely on.

Please note:

Front cover is missing! UPS requires a special power supply cable (not supplied)
