

Sonnet Tempo SATA External Locking

Your Connection to the Outside

Tempo™ eSATA data cables don't compromise—why should you? When using an eSATA Serial ATA host controller and connecting external drive enclosures, you need Tempo eSATA data cables! Unlike thin, internal SATA data cables, these cables offer superior shielding and connectors with metal contacts to provide enhanced EMI protection and improved durability required for external use. These cables adhere to the design specifications recommended by the Serial ATA International Organization (SATA-IO), and are built to last.

Key Features

Connects a SATA host controller card to Serial ATA drive enclosures

Robust external Serial ATA (eSATA) connectors engineered for better retention—springs similar to USB—designed for over 5,000 insertions and removals)

Extra shielding and metal contacts provide better EMI protection

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
