Product description of the manufacturer

Hold on - the power Mac G4 is there! He is equipped with the revolutionary PowerPC G4 with bicycle city engine which processes multimedia data at fantastic speed. The bicycle city engine uses the independent vector processing - a technology which was developed originally for scientific supercalculators. With it an achievement potential is available to you with which you can provide even the most complicated graphics files and work on. Finally, people can work in creative occupations - this encloses art and science - with up to now unequalled productiveness. Apple has conceived the power Mac G4 for person who are active in creative occupations and portion out to the computer as a working instrument high meaning, because he gives the working tempo, her productiveness determines and can be even successful-decisively. At his huge speed which puts all Pentium to processors easily in the shade and his pioneering design is so highly competitive to the power Mac G4 that his speed is measured like by supercalculators in Gigaflops or milliards floating decimal point operations per second. Nearly no other desktop computer offers this achievement, particularly if it is about the use of programmes like Adobe photo shop, the professionals from the creative branch preferentially use. Simply connect a DV camcorder and instal Final cut Per from Apple - and already you have a professional desktop Movie studio.
