

Heidelberg Topaz 3240-3

Heidelberg Topaz in 3240-3 incl. SilverFast Ai studio IT8

Not new

- incl. universal tray
- incl. SilverFast + FireWire Kit for Heidelberg Topaz

Non-new (demo product)

- FireWire Kit for Topaz for Mac + PC

With this Kit you can pursue your Mac about FireWire in Linotype brightly / Heidelberg Topaz.

Including CD with demo version of the scanner software SilverFast from the house LaserSoft Imaging AG

Please, with order give whether Mac or PC version is wished.

Brakensiek system house GmbH & Co. KG is a distributor for everybody Laser-softly products as well as Exclusiv distributor for Silverfast for Topaz, SilverFast for Nexscan, Silverfast for S3300, Silverfast for S3400, SilverFast for tango.

Now the prize-winning scan software SilverFast of Laser-softly Imaging, Kiel, is available for Heidelberg High-End scanner scanner & Macintosh OS-X TIGER.

SilverFast Ow STUDIO for Heidelberg High-End scanner enables to write the full dynamism extent of the hardware in the TIFF data. With it the disadvantageous reduction of the data on 24 bit RGB becomes superfluous. To store the possibility these raw data and by the SilverFast HDR STUDIO weiterzuverarbeiten opens an absolutely new workflow.

With SilverFast Ow STUDI the full dynamism extent of the hardware (3x16 bits = 48 bits) can be written in the TIFF data. A computer with double core processor is recommended, on this occasion. To store the possibility raw data and to process STUDIO by SilverFast HDR, maximum quality opens an absolutely new workflow and with it for productiveness. Chromagraph and Linotype brightly Topaz of 3240-I scanners, 36 bits supported only the scan mode to 24 bits, because these scanners with 3x12 bits can feel and transfer no 3x16 bits = to 48 bits.

Important features:

NEW: Fully automatic IT8 Kalibration

With the new SilverFast version professionals and also private users can concentrate completely upon correct colours and neglect the demanding technology behind it. Simply while the scanner is first calibrated.

By the combination of the automatic Rahmenfindung and the integrated cash code technology in Laser-softly Imaging IT8-Targets the whole calibration process runs completely automatically.

A Prescan is not necessary.

Simply place the Original laser-softly Imaging-IT8-Target on the scanner and begin the calibration process IT8.

To begin the workflow for the digital picture treatment with an optimum colour reproduction, protects maximum colour quality for the issue.

IT8-Targets

The high-quality IT8-Targets – topleight-as well as throughlighttargets – produces Laser-softly Imaging in own IT8 production. Besides, by small loose dimensions becomes highest ones Precision secure.

An applied for a patent bar code integrated in the SilverFast-IT8-Targets makes sure that the authoritative data are identified.

new: SilverFast car Frame adjustment and free rotation

Particularly when one many different presentations on the scanner lie has, the car Frame can find adjustment in combination with the automatic frame recognition the presentations with a click now not only automatically and "frame", but the pictures are still aimed automatically in the right corner.

Now this job are finished comfortably by the intelligent algorithms to the recognition and adjustment of the frames with the biggest simplicity. In addition, the frames can be rotated for the purpose of the fine tuning simply by hand in any corner. The car Frame adjustment was conceived quite especially with an especially easy, comfortable and time-saving scan experience in the sense.

new: An automatic colour fault distance (CCR) in NegaFix

An automatic colour fault distance (CCR) was added new to all SilverFast versions in which obligatorily NegaFix is included. By this functional enlargement one succeeds even more colour fault-neutral results in achieving. The use is easy and occurs quite comfortably through clicking the multiplechoicefield CCR in the NegaFix dialogue, as below shown

new: Improved Entrasterung

SilverFast has a completely new Entrasterung to remove the half-tone dot of printed presentations. The anew developed Entrasterung in SilverFast is to be recognised in the situation the grid of the scan presentation automatically

4 kinds of the Entrasterung are made available:

Auto-Entrasterung
Auto-Entrasterung intensely
Entrasterung
USM & Entrasterung

"Auto-Entrasterung" and „Auto-Entrasterung intensely“ are fully automatic systems.

Customer reports:

Robert D. Vernon: "I need a consistent, predictable and reliable solution. SilverFast fulfils these demands ..."

Ricardo Barros: "Since 2001 I work with SilverFast. It was at the time the best software which was available. Since then SilverFast has always become even better."

Paul Sherr: "After purchase of a scanner and work with SilverFast it is an absolutely new world! I can work so adaptably as I would never have fancied."

Felix Gatt: "Recently I have on the version 6.5 upgegraded and am inspired how SilverFast with CS3 works."

Paul Butzi Photography: "What fool was I. ... How much time I could have saved. ... Now I scan only with SilverFast."
