

Steuerungsrechner für verschiedene Schneideplotter u.a. Leica Wild TA 410

There is a control computer for various cutters. The system has been used a Leica WILD TA to control 410th

As a control software is installed on the system software version 4.0.22 in the ProfiCut PLUS PLUS by WBF. With this software you can create a variety of formats, cutting templates and send them directly from the software to the plotter.

The software can be used to import various file formats, or directly into ProfiCut create new templates. Various tools for the design of the templates help them.

Desweitere are preinstalled on the system, different font types, with which they are sure that's right for your project exactly. The spectrum ranges from old-Germanic to neumodernen graffiti fonts.

Production-related parameters such as cutting speed, cutting head settings, precision fitting and much more can be set by software.

Furthermore, they can also enter the measurements of film and get a preview so directly on the positioning of their individual Plottaufträge, this allows them the most efficient and cost-saving plot to.

If they also are interested in acquiring a cutter, they should contact us and we can certainly offer them a suitable model.
