

DIERS Formetric II 3D/4D Stato- dynamical analysis of the spine, body structure and posture with software Virtual Spline 3.1 and VRS

DIERS Formetric II 3D/4D Stato-dynamical analysis of the spine, body structure and posture with software Virtual Spline 3.1 and VRS

The analysis system allows for quick DIERS formetric 4D static and dynamic (functional) optical measurement of the back and spine. The procedure is radiation free and works without contact. Variety of clinical problems for objective analysis of body posture and posture, scoliosis, and all forms of spinal deformities can be shown. The new 4D technology is groundbreaking for the entry into clinical functional measurement technique to increase the measurement accuracy (4D-averaging) and to avoid measurement errors caused by variances attitude.

In collaboration with leading European universities in the fields of biomechanics and sports medicine were from the test results of the 4D-spinal and motion analysis, the pedography and develops automated analysis of muscle strength and patient-individual training plans.
